Total food composted

4,108 lbs

Total emissions (CO2e)

.83 tons

2076 gallon water jugs

Total beverages donated

42 gallons

Emissions diverted

1.12 metric tons

100% PLASTIC-FREE AND BIODEGRADABLE OPTION

We've revolutionized beverage service with a completely plastic-free experience - because sustainability shouldn't come at the cost of convenience. Traditionally, single-use plastic bottles were the go-to in the catering industry, offering an easy solution for both clients and companies. But with a growing commitment to reducing our carbon footprint, we knew it was time for a change.

So we got to work. The result? A 100% plastic-free beverage solution - from our in-house operations to your event venue. We've cut our reliance on single-use plastics and reimaged what sustainable catering can be. Ready to experience the future of beverage service? Ask our sales team how we can bring this innovation to your next event!

FOOD DONATED AND FOOD WASTE DIVERTED

2024 was a milestone year for our sustainability initiatives, marked by impactful community outreach and a commitment to tackling local food insecurity. One of our proudest achievements was partnering with community organizations to bring fresh, nutritious food to those in need—spreading joy and nourishment to countless smiling faces.

Early in the year, we were honored to join a citywide Food Waste Reduction Challenge hosted by the Sustainable Business Network. We not only embraced the challenge—we surpassed our own expectations and secured a top-three finish!

This experience pushed us to refine, innovate, and elevate our operations, leading to lasting improvements that continue to shape our sustainable future. We're more committed than ever to reducing waste, optimizing our processes, and making a meaningful difference—one meal at a time.
